Premium Quality Technical Service at Overall Lower Cost

Time and time again, Fortune 1000 companies, mid-sized businesses and startups have turned to Adaptive Minds for high quality talent to build intelligent custom web and database systems. We integrate off-the-shelf software with custom built software to bridge the gap between

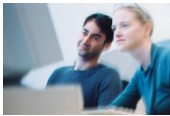

Staff augmentation and mentoring is a core part of our business

customers and businesses, automate business processes, help management make better decisions and meet customer-specific objectives.

We program distributed applications and web services in contemporary technology such as Java, .Net, Visual Basic, C Sharp, HTML, XML, Javascript, PowerBuilder, Spring and Hibernate. We have a wide breadth of deep skills in architecture, programming, database, H/W and network engineering, all of the skills required to produce systems that will have a longer shelf-life and not require major rework. We program and administer on the popular databases in Oracle, SQL Server, DB2 and other

popular databases on Linux and Windows Server.

Services

We either augment company staff to help companies deliver results and train staff, or provide a complete system solution. Call us to see how we can help you in any of the following areas:

- Programming of web, client/server or mobile systems.
- Distributed application design and architecture using best practice methodologies
- Java, .Net, Visual Basic, C#, HTML, XML, SOAP, UML, Jasper, Javascript, PowerBuilder Spring, Hibernate, JBoss, Websphere, Tomcat, Weblogic, Oracle, SQL Server, DB2, Any database, PHP.

Ask about our custom turnkey solutions—the entire system is custom built and delivered to you ready to plug-n-play.

- Utility Metering, Invoicing Systems, A/R systems, CRM, Financials, Inventory Control, Healthcare Claims, Publishing, Forward and Reverse Auctions, Email Alert Systems, Entertainment and Affiliate Systems, Branding, Security Systems, Sales Lead Generation Systems, Dashboard, Web Portals, POS, Purchase Order sys-

tems, EDI, e-Commerce, ERP integration, Postal sorting systems and any virtually custom application that can be conceived and articulated.

- Database programming and administration Oracle on Linux, Microsoft SQL Server, DB2
- Red Hat or SLES Linux, or any flavor of Windows Server.

Industries

We provide top technical skills to help companies build new products, reduce costs, improve service and/or grow profits in virtually any industry. Some industries we have served are utility, financial, credit information, technology, education, lottery, pharmaceutical, healthcare, supply chain, entertainment, retail chain industries and much more.

Call us or email us to see how we can help your company in your industry.
